SharkNINJA

Opportunity: Why Now?

The convergence of data and AI is redefining how companies compete in product innovation. Turning data into decisions, faster than competitors, is the opportunity.

Explosion of real-time data reveals customer needs and competitor moves

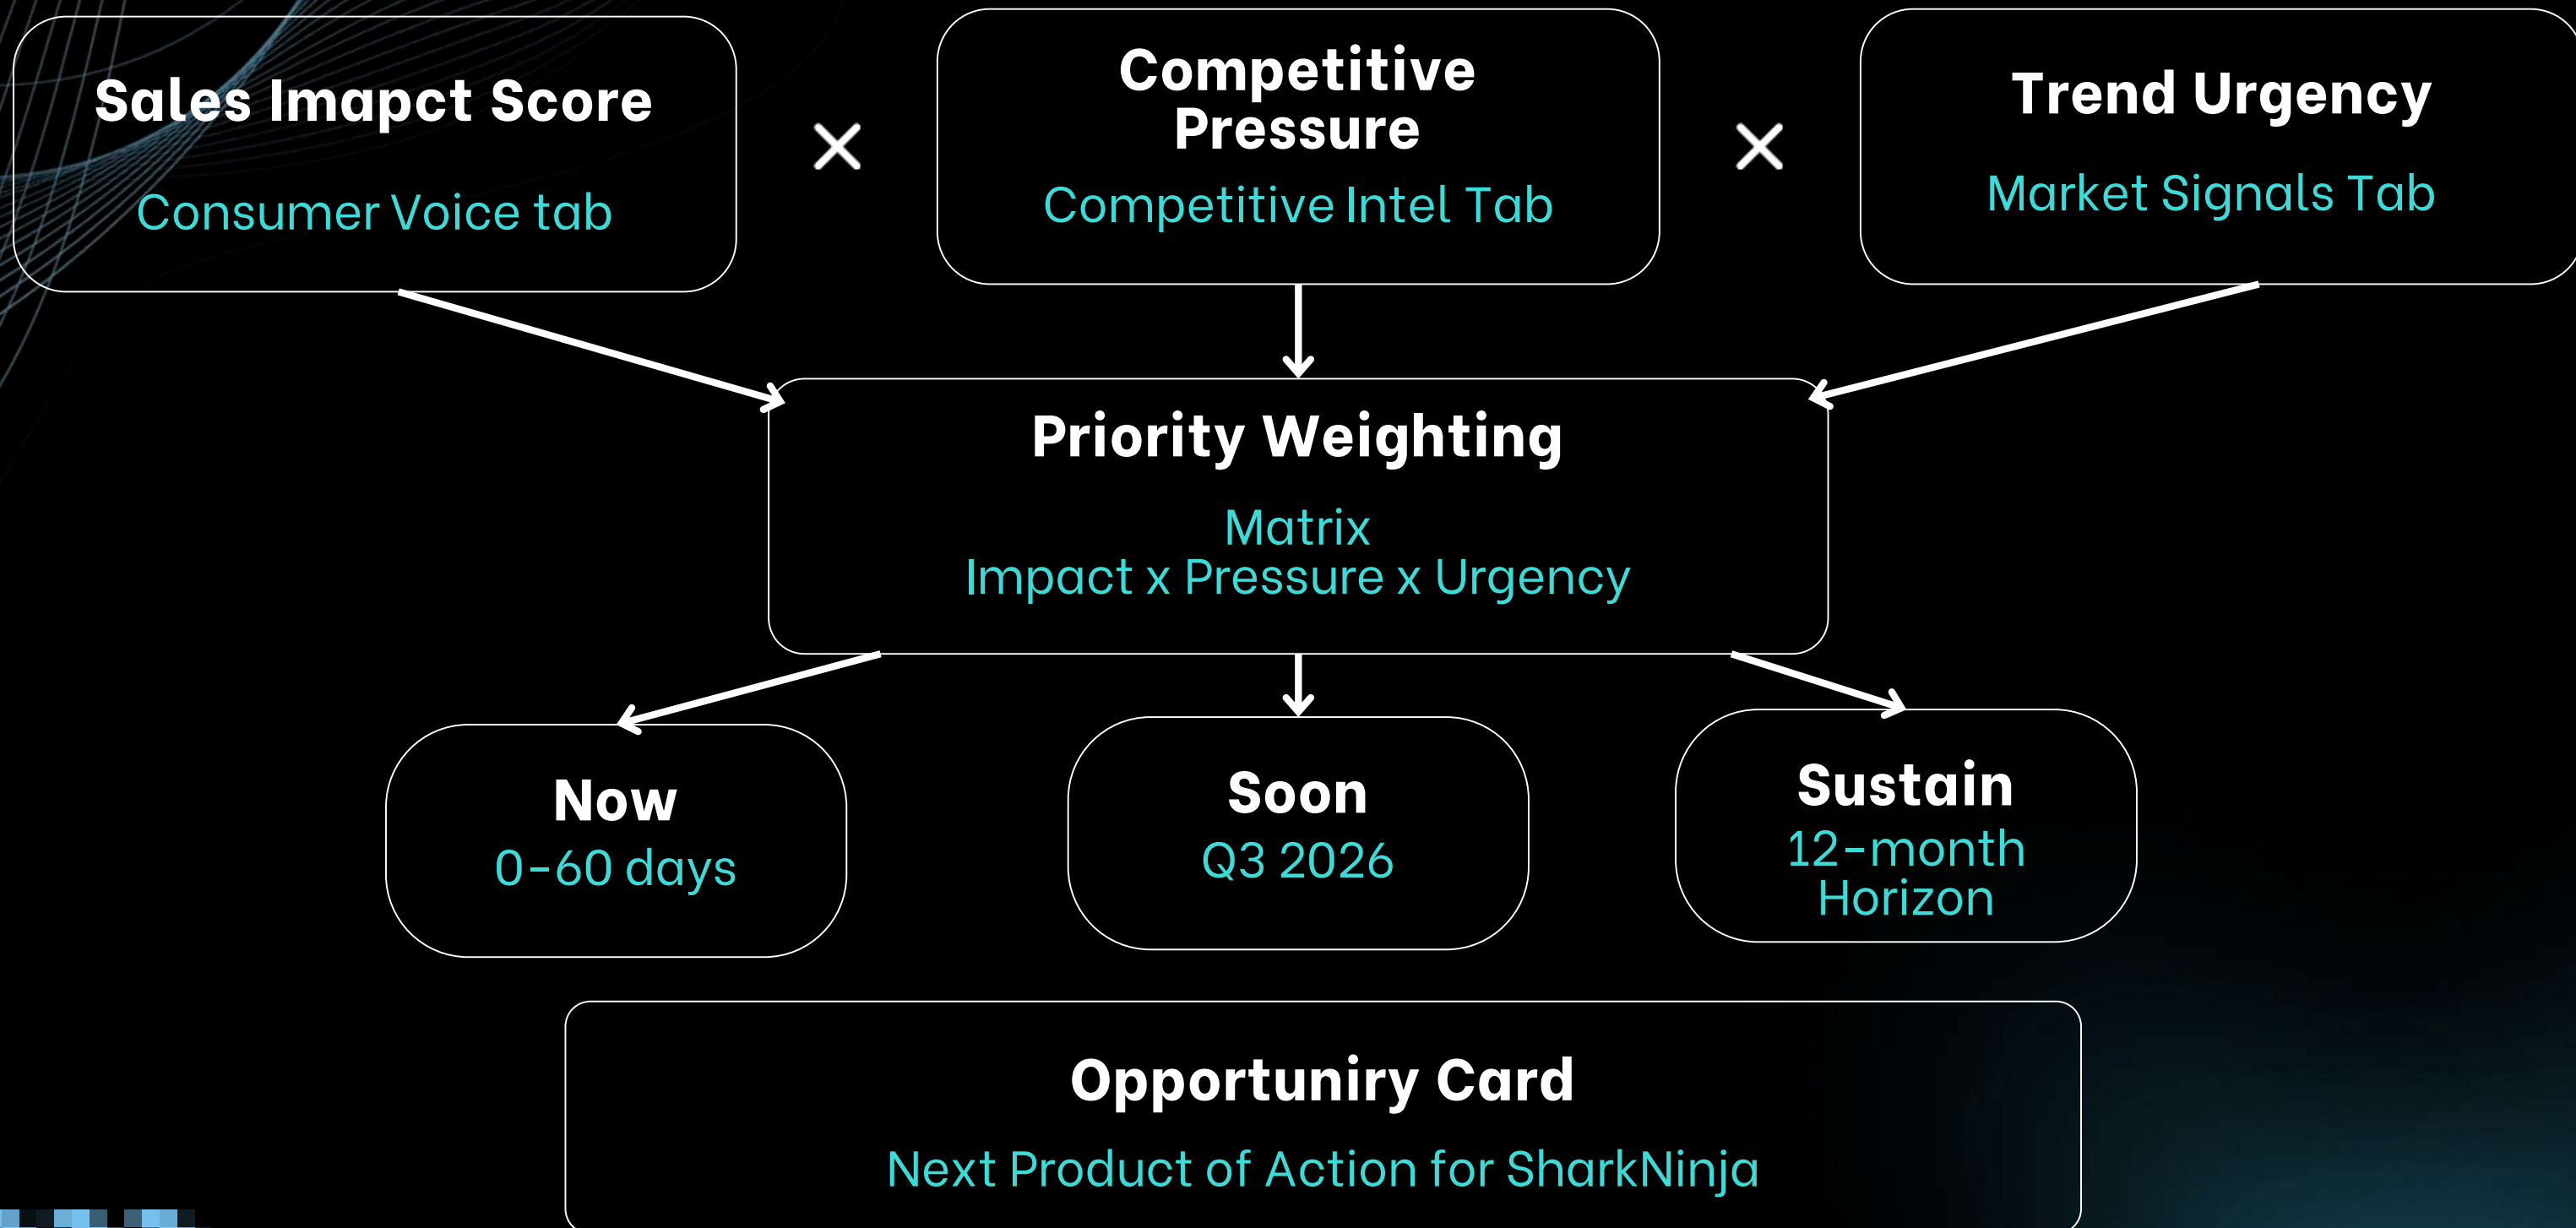

AI converts unstructured data into actionable insights at scale

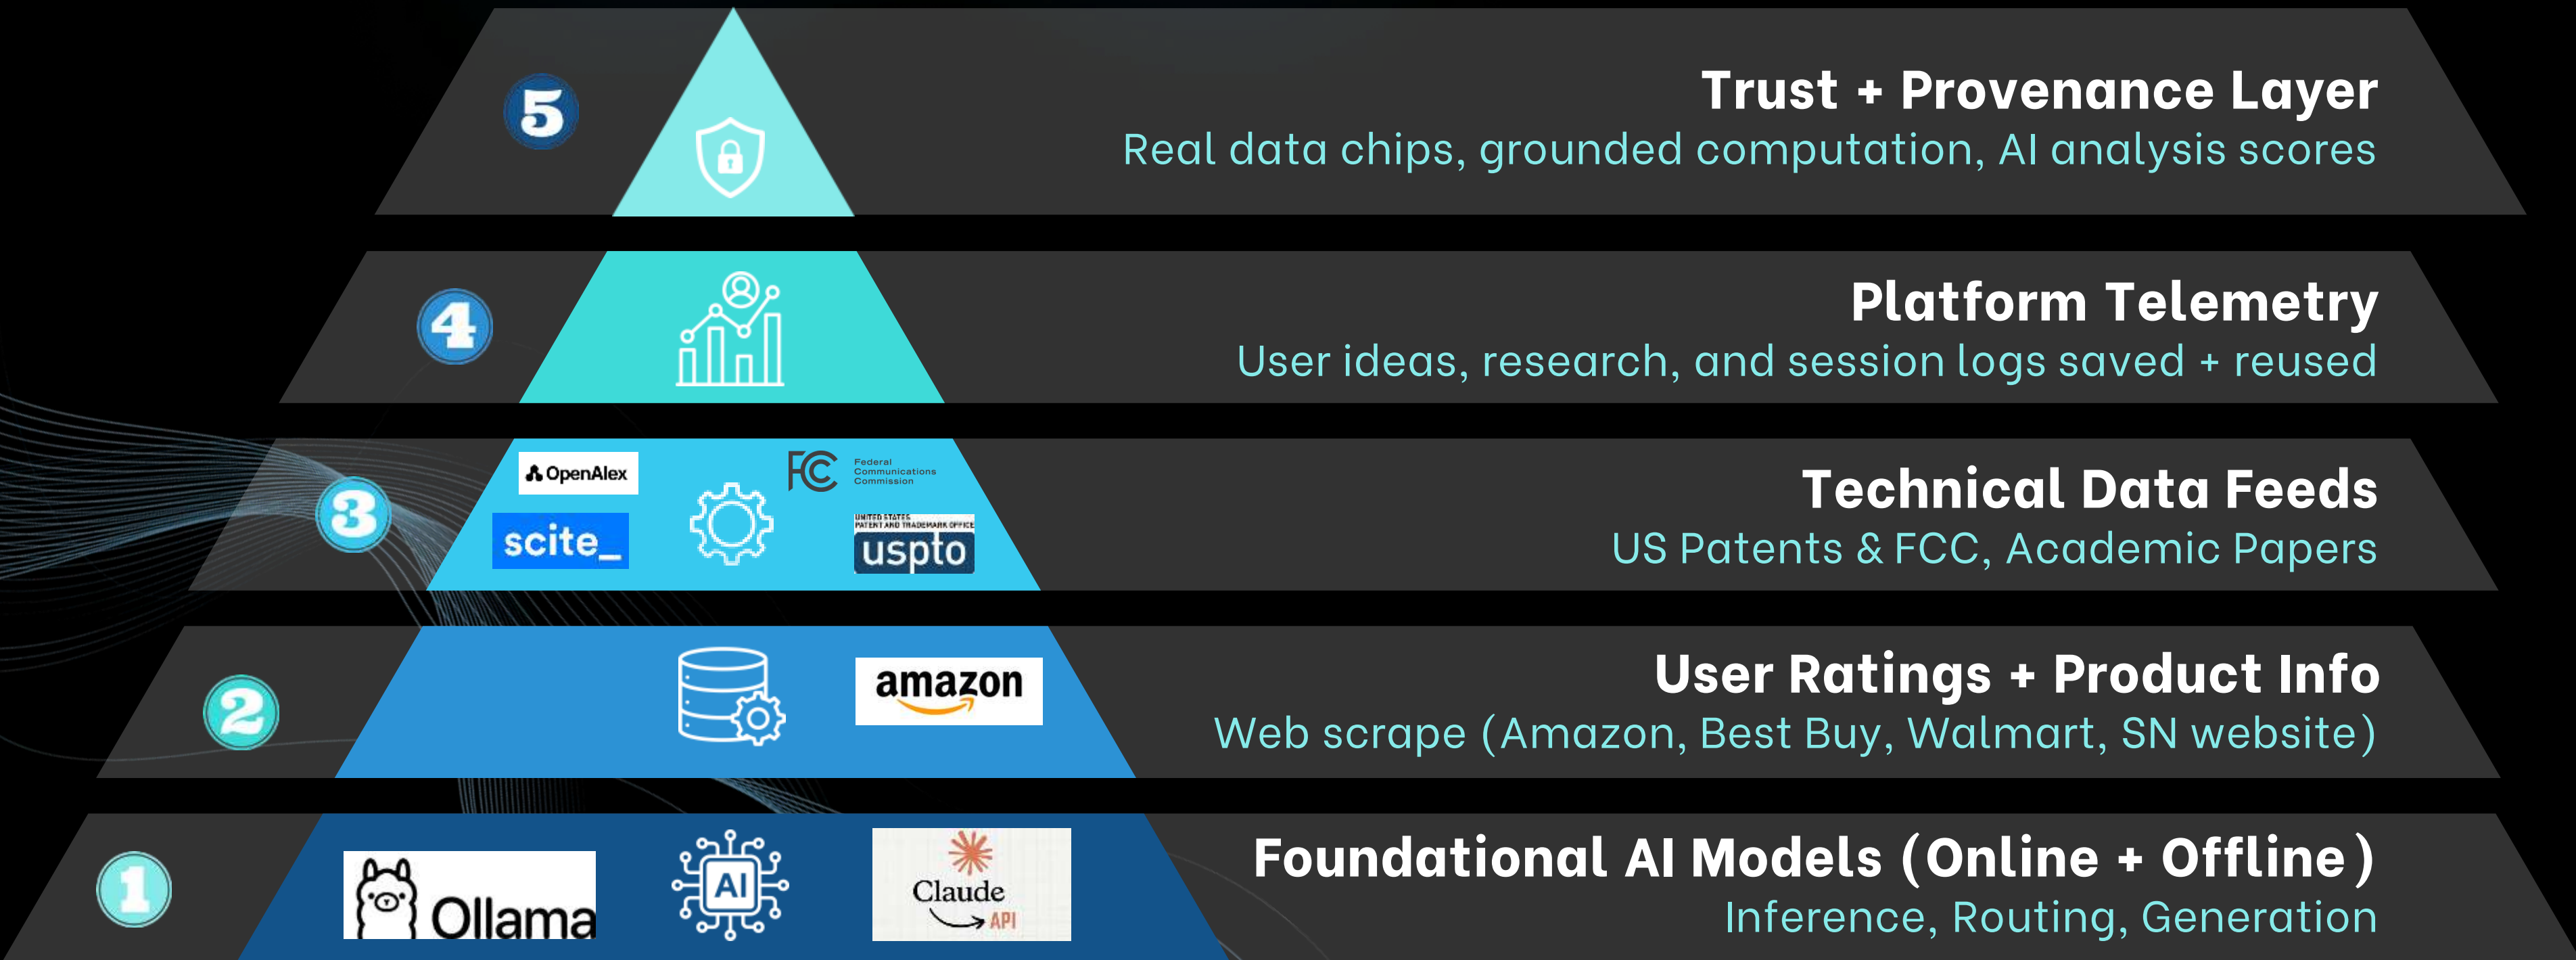

Rapid trends reward companies that turn insights into products fast

AI Insights

Platform Architecture

Our Data Sources

Claude API / local AI models

AI inference, raw idea generation, data synthesis

SharkNinja Website

Product line covering 36 categories, features, prices, and descriptions

Scite MCP/OpenAlex API

State of the art Academic research with over 477 Million publications

Creating our Dashboard

Retailers

Sample of 300+ reviews per category across Amazon, BestBuy, and Walmart

USPTO

US patent filing information for over 12 million patents

FCC

Research and new product information from 80+ certification bodies

Roadmap for the Future

Ideas to be Implemented

Claude API / local AI models

05

Social/Workflow Integration

Team members can generate reports together and work collaboratively

04

Global Market Comparison

Break down all metrics by region for more localized predictions

03

Advanced Financial Metrics:

Detailed market analytics predict financial outcomes of a new product

02

Global IP Information:

Include how innovations might be limited by patents internationally

01

Idea Database

Archive of past product concepts that get automatically flagged when relevant trends re-emerge
